

FISHING REPORT

PIRARUCTU

2023 SEASON

Week 2 – September 10 to 15

Water Conditions:

Water Level very low and still dropping very fast

Weather Condition:

One morning of little rain and lots of beautiful weather

Fishing stats:

Group: 8 anglers

Total number of fish landed in the week – **34**

Biggest fish landed in the week - **187cm**

Fishing Conditions:

Our second week was just great with a super cool group of South African anglers, with lots of saltwater experience. They put all their knowledge and the arapaima had no chance other than to be in our photos this week.

Anglers came from a combo trip with Marié and that was for sure a trip of a lifetime.

Highlight of the week here was the number of fish eating on the surface and lots of big explosions everywhere, just amazing to watch.

Overall an amazing week, lots of fun and some crazy party time.
